

PABI September General Membership Luncheon Café Hope at Timberlane Country Club

PABI held its September General Membership Luncheon on Wednesday, September 27, 2017 at Café Hope at Timberlane Country Club. Keynote speaker Mario Ceravolo, Manager of Capital Projects at Entergy, updated Members and Guests on the SELA 3 Transmission Project. The \$60 million project began in March of this year and involves the construction of a 10.5 mile 230 kV transmission line between the Oakville and Alliance Substations. Mr. Ceravolo described the project, the primary purpose of which is to improve reliability by tying two existing substations together. He also discussed the challenges associated with the project, including moving existing underground utilities, working with the DOTD on safety regulations, and ensuring that the transmission poles are hurricane safe. Sheriff Jerry Turlich also updated the audience on a series of robberies that occurred that morning in the Parish.
